PROFESSIONAL SUMMARY

Software Engineering Graduate with full-stack development training and a focus on building reliable, responsive web applications. Proficient across the development lifecycle, from database design to deployed UI, using Python, JavaScript, and modern frameworks like Vue and Django. Experienced in Agile team environments, Git workflows, and technical problem-solving. Brings strong professional discipline and communication skills from customer-facing experience, ensuring a focus on both code quality and user requirements.

CORE SKILLS

- Languages: Python, JavaScript, TypeScript, PHP, SQL
- Frontend: React, Vue 3, Vite, HTML5, CSS3, Tailwind CSS
- Backend & Tools: Node.js, Django, REST APIs, Docker, Git/GitHub, Oracle, SQLite
- Engineering Practices: Agile/Scrum, SDLC, Version Control, Software Testing, Debugging, API Integration
- Technical Knowledge: Cloud Computing (Azure), Cybersecurity, AI/Machine Learning, Data Science

EXPERIENCE

Life Choices Studio - Software Development Trainee | Apr 2026 - Present

- Developing and maintaining responsive full-stack web applications using Python (Django) and JavaScript (Vue.js) within an Agile team environment.
- Collaborating with developers using Git and Agile workflows to deliver project requirements effectively.
- Facilitating Agile ceremonies as Scrum Master, improving team coordination and streamlining workflows.

ARA - Debt Collection Agent | Jun 2025 - Jul 2025

- Resolved complex customer payment queries within a target-driven, high-pressure environment.
- Maintained precise data records in internal systems, reinforcing a strong commitment to data accuracy.
- Communicated clearly with clients to negotiate solutions, demonstrating resilience and professional problem-solving.

PROJECTS

Glow-Cart Ecommerce Platform | [GitHub](#) | [Live Demo](#)

- Engineered a responsive ecommerce platform, streamlining product browsing and secure user transactions.
- Implemented backend logic and mobile-friendly interfaces, strengthening application performance and usability across desktop and mobile devices.

Homes & Beyond (Property Listings) | [GitHub](#) | [Live Demo](#)

- Developed a responsive real estate property listing application, optimizing data retrieval and search efficiency.
- Architected modular, reusable components, enhancing code maintainability and ensuring a seamless, high-performance cross-device experience.

Fitness Scheduler | [GitHub](#) | [Live Demo](#)

- Designed an interactive scheduling interface, optimizing backend data handling with Oracle to support complex query operations.
- Achieved a 94 Lighthouse performance score, significantly reducing load times and enhancing user interaction efficiency.

NewsApp | [GitHub](#) | [Live Demo](#)

- Developed a responsive news application allowing users to view and manage feed content with secure authentication.

EDUCATION & TRAINING

- Software Engineering Bootcamp | HyperionDev | 2025 - 2026
- Youth Code Certification | Life Choices Academy | 2025 - 2026

CERTIFICATIONS

- Microsoft Learn: AI Fundamentals & Azure AI
- Coursera: AI on Microsoft Azure; Azure Machine Learning
- IBM: Cloud Essentials
- Cisco: Introduction to Data Science & Cybersecurity

VOLUNTEERING

- Two Oceans Marathon: Hydration Station volunteer, coordinating logistics in a high-traffic event environment.
